Enrollment as of March 4, 2016. Total enrollment fluctuates on a daily basis with student mobility. Our district has a higher than state average of student mobility (18% compared to state average of 12%) meaning we have a high number of students moving in and out of our schools. The number in parenthesis represents the number of regular classroom teachers per grade/school. Student to teacher ratio is dependent upon subject/class and student learning needs. Classes such as physical education have a much higher student to teacher ratio while students needing educational supports have a much lower student to teacher ratio.
